CEAS Calculations for New 2013 Engine Programme from MAN Diesel & Turbo

In continuation of the Market Update Note of 4 February 2013 regarding the new 2013 engine programme and performance data, we are pleased to inform you that the online engine and performance data calculation program CEAS has now been updated to reflect the improved SFOC of the following engine types:

- G50ME-B9.3
- G50ME-B9.3-GI
- G60ME-C9.2
- G60ME-C9.2-GI
- G70ME-C9.2
- G70ME-C9.2-GI
- G80ME-C9.2
- G80ME-C9.2-GI
- S90ME-C9.2
- S90ME-C9.2-GI

For these engines the SFOC has been lowered by 1 g/kWh over the entire load range and for all tuning methods.

Access to CEAS can be obtained via the following URL

http://www.mandieselturbo.com/ceas/index.html

New data for the S80ME-C9 and S80ME-C9-GI will be implemented in CEAS, along with their new designations S80ME-C9.4 and S80ME-C9.4-GI, simultaneously with other updates of CEAS before the end of February. In the meantime, the 2 g/kWh SFOC reduction already announced, compared with the data available in CEAS, can be used.

Best regards

MAN Diesel & Turbo
